Now they are back:

with their new song "**TAKE ME HOME**" (Release Day: NOV 8th, 2024)

---

### **ABOUT THE NEW SONG**

"Finding **YOUR WAY** does not mean that you always know where you are going. The important thing is that you know how to find your way **HOME...**".

"**TAKE ME HOME**" feels nostalgic and familiar in its essence as the soundscape and lyrics remind you that our biggest quest is to uncover our truest selves and discover where we belong. Home is where you feel the most comfort and the most inspired, and when you arrive at that place, you'll never want to leave again.

## Now, let's shine a spotlight on the individual talents that constitute this duo:

Jordana Moon is a singer-songwriter from Western Canada whose music is a harmonic homage to consciousness and empowerment. Jordana studied creative writing at the Vancouver film school. Her inspiration sprouts from a variety of genres and artists ranging from jazz, trip-hop, neo soul, to the likes of Joni Mitchell, Lauryn Hill, Bee Gees, Portishead, and Massive Attack.

On the other hand, Tom Aries, an electronic synthesizer musician from Western Germany, pours his classical piano education into spellbinding synth sequences. Having already made his mark in the sphere of computer game music and film soundtracks, Aries now directs his creativity towards the duo's offerings, attributing his inspiration to Depeche Mode, Kraftwerk, ABBA, Portishead, Röyksopp and the classic sounds of the 80s.

## Behind the scenes of MOON AND ARIES:

The duo's journey into the music industry started on March 1, 2021. Both artists, separated not only by the Atlantic but also a whopping nine-hour time difference, found a common rhythm, working harmoniously through file sharing and virtual collaboration. Despite the geographical divide, Moon residing in Canada, and Aries in Germany, they have succeeded in creating a global impact. Their discography has sounded across a myriad of radio stations spanning Australia, Europe, Africa, Asia, and America.

The fruitful collaboration between MOON AND ARIES has seen them progressively push boundaries. 2022 marked their foray into the platform with "The Arrival", a nine-track concept album. Followed by another 9-song concept album, "Break the Matrix" in 2023. And 2024? "TRANSCENDENCE" – a theme song album with 12 songs for each month of a year (Released: SEP 6<sup>th</sup>, 2024).

By the way: their song "FIRENIGHT" reached the TOP 1 position of the official DJ-pool charts in the USA. "THE ARRIVAL" is with more than 1 million streams their most successful song on SPOTIFY.
